AI Analysis

Apple showed strong revenue growth from 2020 to 2021, followed by more moderate growth and a slight dip in 2023 before recovering in 2024. Net income consistently remained high, showing steady growth throughout the period with margins remaining relatively stable. Microsoft experienced consistent revenue growth across all years, with net income also increasing steadily, indicating consistent profitability. NVIDIA demonstrated explosive revenue and net income growth, particularly from 2022 to 2024, representing a significant increase in profitability.

Revenue vs Net Income or Profit (in USD Billion)

Revenue & Net Income or Profit — All Years
